SUMMARY

Results-driven Computer Engineering graduate (Excellent with Honors) with hands-on experience across full-stack software development, networking & IT infrastructure, and cloud computing. Delivered 4+ hands-on software and network infrastructure projects and completed 7 professional training programs and certifications, including Huawei Networking and HCIA-Cloud. Skilled at simplifying complex technical concepts, quick to learn, and eager to contribute to a professional engineering team as a Software Engineer or IT/Networking specialist.

EDUCATION

Bachelor of Engineering in Computer Engineering

10/2021 - 06/2026

Faculty of Engineering, Shoubra, Benha University

Grade: Excellent with Honors | Graduation Project: A+

PROFESSIONAL EXPERIENCE

Back End Developer - RoadxPert (Startup) | Part-time/Freelance

04/2026 - 07/2026

Remote

- Built and maintained RESTful APIs (Node.js & Express.js) for the company's mobile app, published on Google Play.
- Designed backend logic and MongoDB schemas to support core app features.
- Collaborated with the front-end/mobile team to ensure smooth data integration.

PROJECTS

Quran Learning & Recitation Platform

Graduation Project

- Front-End Lead Developer: built responsive UI with React, TypeScript, ShadCN/UI, and Tailwind CSS.
- Implemented protected routing and dynamic dashboards for teachers and students.
- Integrated frontend with Spring Boot REST APIs for seamless data flow.
- Applied performance optimizations, including code splitting, lazy loading, and memoization.

Multi-Department Enterprise Network Design

Hands-on Lab - Cisco Packet Tracer

- Designed a small office network topology for three departments: HR, IT, and Guests.
- Configured VLANs to isolate department traffic and implemented DHCP on the router for dynamic IP assignment.
- Set up OSPF routing between multiple routers to enable full network connectivity.
- Applied an ACL to restrict Guest network users from accessing HR servers, simulating a real-world security policy.

Recipe Project

[Demo](#)

- Responsive web app built with HTML, CSS, JavaScript, and Bootstrap that fetches meal data from an API, featuring dynamic search and recipe display.

Social Media App (Facebook Clone)

[Demo](#)

- Facebook clone built with HTML, CSS, and JavaScript, featuring an interactive UI with post display and core dynamic functionalities, focused on responsive design and a seamless user experience.

CERTIFICATIONS, COURSES & TRAINING

Customer Service & Sales - iCareer

01/2026 - 06/2026

- Completed theoretical sales training and applied concepts through hands-on projects: Gemini and Wazzaf.

MEAN Stack Intern - National Telecommunication Institute (NTI)

09/2025 - 11/2025

- Advanced hands-on training in Angular, Node.js, Express, and MongoDB through real full-stack projects.

CIB Bank Online Training Program - Commercial International Bank (CIB)

08/2025

- Covered banking fundamentals, digital transformation, sustainability, and AI in financial systems.

Huawei Networking Training - Huawei

07/2025

- Hands-on training covering fundamental routing and switching concepts, VLAN configuration, and network security basics.

HCIA-Cloud Computing - Huawei

07/2025

- Completed official HCIA-Cloud Computing certification course, gaining foundational knowledge in cloud computing concepts, virtualization technologies, and Huawei Cloud services (compute, storage, networking).

Frontend Developer Intern (Angular) - Digital Egypt Pioneers

05/2024 - 10/2024

- Completed full program with strong performance in HTML, CSS, JavaScript, APIs, Bootstrap, and Angular.

Data Analysis Intern - Innovation Center, Benha

07/2024

- Received training in the fundamentals of data analysis with a particular focus on Excel.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, TypeScript

Computer Science Fundamentals: OOP, Data Structures, Algorithms, Operating Systems

Front-End: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Angular

Back-End: Node.js, Express.js, RESTful APIs

Databases: MongoDB, SQL

Networking & IT: TCP/IP, OSI Model, IPv4 Subnetting, VLANs, DHCP, Static Routing, OSPF (basics), NAT, ACLs (CCNA-level knowledge, practiced on Cisco Packet Tracer)

Cloud Computing: Huawei Cloud (ECS, VPC, OBS) - foundational knowledge, HCIA-Cloud training completed

Development Tools: Git, GitHub, Postman, VS Code

Soft Skills: Communication, Problem Solving, Leadership, Teamwork, Adaptability

ACTIVITIES & LEADERSHIP

Head of Web Development - IEEE Benha Student Branch

- Led the web development team, mentored junior students, and managed task distribution across projects.
- Delivered technical training sessions on front-end development and web technologies to a group of 12 students.

Ambassador - iCareer Egypt

- Promoted career development programs on campus.
- Increased student engagement through outreach and event support.

LANGUAGES

Arabic: Native | English: Intermediate (good reading and writing of technical documentation)
